The periodical section enjoys the subscription of more than 20 thousand e journals and 07 magazines (Technical and General) along with 10 prominent dailies.

Library sections:

Acquisition Section:

This section performs the major activity of the library collection development procurement documents to the library are mainly based on the recommendations made by the faculty as well as experts of the concerned departments.

Technical Section:

This section performance the major technical processing activities like classification, cataloging etc. Newly arrived documents list will be displayed on the notice board. College Library has set up a technical section of all the books is well processed and all books are classified according to the 22nd edition of DDC.

Bar code based Circulation section:

The NewgenLib software has been successfully implemented for the circulation section activities by using the barcode. All the library books are barcoded. We are continuously available from 8.30am to 5.00pm for the issue and return of the books.

Reference Section:

The College Library has large area and accommodates about 250 students for reference work at any time. There is a collection of more than 2500 books in the reference section.

Periodical Section:

Periodical section is one of the major sections, which provides latest information to user community at present library subscribes more than 20,000 national and international journals. This section also possess important reference oriented documents and magazines. At present this papers.

Arrangements:

Library has open shelf system keeping in mind the objective of easy access to the document all the books have been arranged branch wise/subject wise/semester wise.

Digital Library:

The Library uses Newgenlib software package which is an integrated multi-user library management system that supports all in house operations of the Library. This software consists of modules on acquisition, Cataloguing, circulation, serials, article indexing and OPAC. Retrospective conversion of bibliographic records has been completed. Students can now be accessed through the Newgenlib software OPAC. The database of books available in the library is being updated on day to day basis with details of recently acquired books. The editing and updating activities are being in progress. We are living in an age of information communication technology explosion where it has become almost impossible for any library or information centre to acquire and store all the literature even in single field. A digital library is a library where reading material is kept in the form of CDs, DVDs, and database and in other microforms and the same is accessed with the help of computers. Our digital library has 34 well equipped computer system and more than 575 CDs covering various subjects. The continuous developments in information and communication technology (ICT) have had a far reaching impact on library and information institutions and services worldwide. Information is dynamic and unending resource that affects all disciplines and all walks of life.
